1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-5 and 14-18, drawn to group I,
classified in class 370, subclass 352.

II. Claims 6-9 and 10-13, drawn to group II,
classified in class 370, subclass 331.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the group I is directed towards converting data from a mobile to a VoIP/IP network using a gateway but invention of group II is directed towards the method involved with handing off a call from a first base station to a second base station.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
